Disabled access fully compliant with building regulations and DDA requirements

ELECTRONIC ROOFLIGHTS
UNDERFLOOR HEATING/COOLING
RUBBER FLOOR FOR INSULATION
WIRELESS IT CONNECTIVITY
INTERACTIVE COMPUTERISED WHITEBOARDS
SMOKE CLOAK SYSTEM

class leading

Setting the standard for the **next generation**

Building high quality, high specification modular buildings is what we do. Equipping them to meet the specific needs of our customers is what makes our buildings excellent.

Tailored designs with a variety of internal and external finishes; one, two and three storey structures to optimise space; and a whole host of electronically controlled devices to improve the working environment. It all contributes to the enjoyment and functionality of a Linkpak NG commission.

modern thinking

Utilising sustainable resources for the next generation

Danzer Linkpak NG modular buildings are now the industry standard in modular accommodation.

Years of expertise gained from delivering projects for schools and colleges, hospitals and laboratories, offices and leisure facilities have enabled us to develop and refine a market leading product perfectly suited to a whole host of spatial needs.

And as the move towards carbon neutrality gathers more momentum, so we have added a range of environmentally friendly features to improve energy efficiency. With lower running costs, Linkpak NG becomes an even better choice when you're looking for a practical building solution.

Delivering real solutions for the **next generation**

Rapid response, speedy construction, meticulous installation. All from one supplier, all from one point of contact. It means we can be more accommodating of your needs and more responsive to your brief.

Our team will deliver your structure in perfect condition for use. Fit for purpose, whichever of the wide variety of uses you choose, and fit for long term occupancy.

Call us today and outline your building needs. We'll be delighted to assist you in explaining what a Linkpak NG modular structure can do for you.
