

SUSTAINABLE MODULAR BUILDINGS from DANZER

Meeting the needs of the present, without compromising the needs of the future.

DANZER can cut the financial and environmental costs of your modular building projects.

With our 3-step plan that covers Economic, Environmental and Social criteria, we have a solution that will suit the most demanding sustainability goals.

Danzer produce some of the most advanced modular and relocatable building systems available. They are designed and manufactured under controlled conditions using the latest technology in state-of-the-art production facilities.

Many years of experience have enabled us to develop and define a suite of market

leading products that are perfectly suited to the special requirements of temporary and permanent buildings.

DANZER is the industry standard in sustainable modular building. Whatever buildings design best suits your needs - the best quality of production, installation and customer service will guarantee our clients a market-leading product.

Innovative development and application of new modular building materials and design features deliver longer lasting, better performing and great looking buildings. Meticulous, extended, refined manufacturing facilities mean a rapid turnaround and superior scale of production.

Why not contact us now to hear more about our 3 steps to sustainability.
